Objective

Dynamic and results-oriented Back-end Developer with expertise in database engineering, seeking to leverage comprehensive skills and hands-on experience to drive innovation and efficiency in web development projects. Dedicated to delivering high-quality, scalable solutions that exceed client expectations and contribute to organizational success. Proven ability to collaborate effectively in virtual environments and mentor junior developers, ensuring team cohesion and continuous improvement. Committed to staying abreast of emerging technologies and best practices to remain at the forefront of the rapidly evolving field of software development. Ready to bring a proactive mindset and a passion for excellence to any team, contributing to the company's growth and success.

I'm an eager and dedicated software engineer with a passion for leveraging AI tools to drive innovation. Seeking opportunities as a Back-End Developer, where I can contribute my expertise in web application development and cloud-native architectures to modernize strategic product lines and propel the company's growth.

Education

BACHELOR OF ENGINEERING (B.E) | 2020 - 2025 | FEDERAL UNIVERSITY OYE-EKITI

- Major: Mechatronics Engineering - Related Course: Software Engineering

META FRONT-END DEVELOPER | META, ONLINE • FEB 2023 - DEC 2023

Through comprehensive online training, I have acquired valuable skills in front-end web development, with a primary focus on React.js. These training modules were meticulously crafted to provide a deep understanding of React.js and its application in building modern and dynamic user interfaces. By immersing myself in these courses, I have developed proficiency in React.js and gained hands-on experience in creating responsive and engaging web applications. This training has not only expanded my technical skill set but has also prepared me to tackle real-world projects with confidence and expertise.

META BACK END DEVELOPER | META, ONLINE • JUN 2023 - DEC 2023

Through self-paced courses, I have acquired a comprehensive understanding and proficiency in back-end development, Rest API, MySQL databases, Python, and Django. These courses have not only expanded my technical knowledge but have also equipped me with practical skills through hands-on projects and coding challenges. With each new concept, I have undergone rigorous testing and coding challenges, developing multiple capstone projects that have further solidified my expertise in these areas.

META DATABASE ENGINEER | META, ONLINE • JUN 2023 - DEC 2023

I completed rigorous courses in database engineering, with a particular focus on MySQL. These courses were meticulously designed to prepare individuals like myself for entry-level roles in the field. Throughout these courses, I delved into various aspects of database engineering, gaining in-depth knowledge and practical skills in MySQL database management.

PROMPT ENGINEERING | VANDERBILT UNIVERSITY, ONLINE | SEP 2023 - JAN 2024

I completed a comprehensive course on Prompt Engineering at Vanderbilt University, where I developed a deep understanding of the skills and techniques required for prompt-driven development. This course

provided extensive training in working with AI models, focusing on how to effectively apply them in research and analytics. During the course, I engaged in hands-on exercises and projects that demonstrated the practical applications of prompt engineering in various fields.

Skills

- HTML
- CSS
- Python
- JavaScript
- Django
- React.JS
- MySQL
- PostgreSQL
- MongoDB
- Amazon Web Services (AWS)
- Google Cloud Run
- Docker & Kubernetes
- REST API
- CI/CD
- Agile Scrum
- Git & GitHub
- DBMS
- Bootstrap

Experience

Freelancer | Upwork | JUNE 2019 – Present

- Worked on multiple freelance projects remotely for cross platform rendering a scalability
- Created and managed multiple database systems for business integration
- Developed Cloud integrations and Restful APIs for automation and scalability of multiple platforms.
- Collaborated with developers to develop functional web systems for individuals and businesses

BACK-END DEVELOPER INTERN | KINPLUS TECHNOLOGIES | APR 2023 - PRESENT

- Collaborated with a team of front end developers and designers remotely and on site to build diverse projects to meet client demands, contributing to back-end development and database engineering.
- Developed database models and management systems for businesses and corporate organizations.
- Integrated AI systems to automate repetitive tasks for businesses
- Mentored junior developers, imparting knowledge on work culture and best practices.
